Our Science project this half term is…

Where does our food go?

We will be developing our scientific skills of observing, measuring and predicting, whilst learning about teeth and digestion. We will study the different parts of the human digestive system and the functions of these parts. We will also identify the different types of teeth and how these reflect the diets of different animals. In addition, we will be looking at feeding relationships within ecosystems.

Our Humanities project this half term is…

Ancient Egypt

The Ancient Egyptian civilization is fascinating in so many ways and it is a topic that children tend to enjoy. We will be learning about the importance of the Nile, how people lived in ancient Egypt and, of course, mummification! As well as this the children will consider the validity of evidence, the role of archaeologists and what artefacts can tell us about the past. We will also link our learning to our writing.

Our English Texts and Writing Outcomes

Our main text for this half term will be Marcy and the Riddle of the Sphinx.

We will be developing a toolkit for writing settings and putting these to use when writing the beginning of an Egyptian themed story. We will then use the character Marcy to write a recount before finishing the half term by writing a set of instructions about mummification.

Year 3 / 4
First Half
Autumn Term
2026

Maths

In Maths, we will have a strong focus on place value. We will be supporting the children in developing quick recall of number facts particularly times tables. We will also be developing our written methods in addition and subtraction.

This half term's Super Powers are :

Year 3 – Number Bonds for all numbers up to 20 and counting in 50s and 100s.

Year 4 – Number Bonds to 100 and counting in 25s ad 1000

We have 2 PE lessons each week focussing on Outdoor Adventurous Activities (OAA) and Fitness. In music children will learn Harvest songs and continue to develop skills using the voice.
In French the children will be learning greetings; how to say hello and introduce themselves.

In DT we will be making pop up books. We will develop an understanding of simple mechanisms to make movement and making skills such as cutting.
